# Guidance on scanning of exempt medicinal products / unlicensed medicines (ULMs) with 2D barcodes

V1.0 MAY 2022

# Exempt medicinal products / ULMs with 2D barcodes on the pack

- ▶ **If you know the pack** is a ULM, **don't scan it** as the IMVS may not recognise the pack
- ▶ **If you inadvertently scan a ULM and get an alert**, you may supply the pack unless:
  - ▶ you have overriding concerns that a falsified medicine is involved or believe the pack has been interfered with, or
  - ▶ the pack as flagged as expired, recalled, withdrawn, stolen or destroyed
- ▶ Always check the **anti-tampering device** (if there is one) – if you have any reason to believe the pack has been interfered with, please report this to the HPRA as a product quality defect and do not supply the pack
